PROCESS TO OBTAIN WATER PRESSURE TESTING

Please follow the following process related to water system pressure testing request:

1. Identify the specific locations based on GIS Mapping and/or Surveying Mapping the fire hydrant location(s) that the requester would like to test for pressure purposes.
2. Prepare a work plan or brief description describing their methods and if applicable the subconsultant that will perform the testing. As part of the work plan, include the names, addresses, contact number, number of tests, dates, and time periods.
3. Briefly provide the reason to obtain water pressure at the requested location.
4. Email the request to the Public Works Department at jferguson@huntsvilletx.gov approval.
5. Coordinate the implementation with James Ferguson, Water Division Superintendent at 936-294-5762 or at cell number 936-661-5883.
6. Provide an email copy of the results to the Public Works Department at jferguson@huntsvilletx.gov and the City Construction Manager at rmarek@huntsvilletx.gov and mmclure@huntsvilletx.gov
